

## Add To... User Guide

Our website allows you to quickly add items to various shopping tools from search results, your My Account portal and other areas around the site.

The screen below is typical of what you see in a search result and illustrates how to use the “Add To...” functions that are available.

When you see the dropdown illustrated below in bullets 1,2, and 3, this means you have the ability to add that item to either a Favorite List (see our user guide on Favorites), an Order Template (see our user guide on Order Templates), or to a Wishlist (see our user guide on Wishlists).
