

## Wish List User Guide

Wish lists are an easy way to generate a list of items for reference later.

Wish lists are commonly used to create a group of items for a job or other project. Wish lists allow you to add items to the list and include a quantity and a note. This is especially useful for buyers that need to build a list of items for a project, keep track of the quantity needed, and could include additional information about the item for the project in the form of a note.

You can create multiple wish lists to accommodate multiple projects or groups.

Add an item to a Wish List can be accomplished from most of the search results of the site by using the “Add To...” button and selecting “Add To Wish List” (1).
