

Illustra Flex Gen4

2MP, 4MP, 8MP Mini-Domes

Key Features

- 2MP, 4MP & 8MP resolution provides true HD quality images with video analytics along with improved WDR
- Built in AI delivers accurate object classification, powerful situational awareness and security automation
- Increased IR Distance
- VideoEdge® TrickleStor technology for edge-based failover redundancy
- Easy to install with user friendly accessories and Wi-Fi configuration
- NDAA and TAA Compliant

High-Quality, Versatile Video Capabilities

The powerful Illustra Flex Mini-Domes are designed to offer a superior image quality, feature rich surveillance option for a wide range of applications. The outdoor mini-domes feature built-in long range IR illuminators to produce clear images at an effective distance of 131 ft (40 m) in a variety of low light conditions. Fourth-generation Illustra Flex models offer high resolution and high performance while simplifying installation and configuration.

Edge Intelligence Driven by Deep Learning AI

Illustra Flex Mini-Domes are powered by the rise of intelligence at the edge. With built-in AI based object classification, events can be narrowed to classes such as person, car, bus, motorcycle and more. Forensic searches becomes more accurate and situational awareness more automated with fewer missed incidences and false alarms. Choose from a variety of analytic rules to customize the solution that will be most beneficial to your business and begin gathering transformative data instantly.

Powerful Technology to Increase Confidence and Savings

The Flex product family cameras feature built-in technology that ensure efficient recording and smart bandwidth management. When paired with VideoEdge, exacqVision NVR or Cloudvue, edge-based failover redundancy allows video recording to continue on the camera when a network disruption occurs or the NVR / cloud is offline. When the connection is restored, video transfers back to the media database for a seamless video timeline experience. Illustra® IntelliZip continuously monitors and optimizes system streaming parameters to match the level of activity within the camera's field of view.

Safeguard Against Cyber Attacks Across Devices

Illustra Flex cameras have been designed to be resilient against cyber threats. Our products are gated, analyzed, tested and required to meet and exceed the rigorous standards of the Johnson Controls Cyber Solutions Product Security Program for every release. This holistic approach is aimed at providing peace of mind to our customers. Our security mindset begins at initial design concept and is supported through deployment, including a rapid incident response to meet the comprehensive and evolving cybersecurity environments.
